

## Introduction to Gambler Shiba

Gambler Shiba (GSHIBA) is being positioned to revolutionize the cryptocurrency gambling industry.

The founder's vision is to become the number one gambling token in the cryptocurrency market. This will be achieved by creating an ecosystem that rewards holders of GSHIBA, while increasing the value of the token through partnerships with online and physical casinos across the world. In addition, GSHIBA will launch their own unique gambling dApps platform where GSHIBA will be the primary means of currency exchange and interaction within the GSHIBA gambling metaverse.

Each strategic step in this process has established the grounds to ensure that Gambler Shiba (GSHIBA) reaches a One Billion Dollar market cap as a baseline. GSHIBA's unique lottery utility, coupled with their aggressive marketing campaigns, will transform the physical and digital gambling landscape as we know it.

## Gambler Shiba as Governance

Gambler Shiba (GSHIBA) is the governance token of the evolving Gambler Shiba ecosystem. It is the first token on the ERC20 network that gives you a chance to win lotteries, paid directly to your wallet in Ethereum (ETH), simply for holding. The lottery, however, is just the beginning. Investing in GSHIBA at this initial stage gives you a chance to be part of a truly revolutionary takeover of the gambling world as we know it. We are positioned to become the number one gambling cryptocurrency on the most prestigious Blockchain network in the Universe.

## GSHIBA Community

GSHIBA has established a community that believes in positivity and collective efforts. Our development group has been gathered from multiple locations across the world, and our business team includes some of the top minds and visionaries the world over. The community that supports GSHIBA is growing at a staggering rate, while innovation and expansion of our outreach continues to generate results that reflect in our ever rising price valuation.

## Decentralization of the Gambling Industry

The gambling industry has been expanding rapidly in the past decade, with huge additions to the Online sector. Online gambling alone saw upwards of a \$70 Billion market cap in 2020, and is projected to grow at a Compound Annual Growth Rate of 11% for the foreseeable future. This industry has been built on centralization of monetary transactions. GSHIBA will disrupt this antiquated system and create the first decentralized gambling currency of the world. GSHIBA will allow people from across the globe to access the space, which will create a massive expansion in market value while simultaneously revolutionizing the current state of business. As you can imagine, we will create an enormous shift towards decentralization, along with ease of accessibility to multiple currencies and transactions.

The GSHIBA community is very proud of what has been accomplished presently, and we cannot wait to further share with our community all of the incoming projects being worked on behind the scenes. With tremendous support from our community, we believe that our targets are all achievable in a very short timeframe.

## GSHIBA and Ethereum

The Ethereum (ETH) blockchain has proven to be the most prestigious and effective blockchain in the cryptoverse. Its security layers are second to none and its mutability allows for truly innovative expansions of the GSHIBA vision.

## The GSHIBA Incubator

GSHIBA will establish its own incubator of ideas aimed at benefitting the gambling industry. This Incubator will play as a mediator between developers and the GSHIBA community to provide vision and create opportunities that strengthen our future and the future of our partners, which will in turn increase GSHIBA's value over time.

## Tokenomics of GSHIBA

Improving on the alpha iteration of GSHIBA, we have introduced our pilot Tokenomic; The GSHIBA Lottery. A lottery system has been created in the spirit of our gambling nature to ensure that all GSHIBA holders are given a fair chance at winning rewards. Instead of a "one size fits all" approach to our lottery, we have applied a tiered system to the GSHIBA Lottery.

## GSHIBA Lottery System

The GSHIBA Lottery system is split between 4 tiers; Platinum, Gold, Silver, and Bronze.

Your tier is calculated based on your ETH purchase amount plus your GSHIBA holdings. This ensures that even if you buy at the top, you can still easily get involved in the higher tiers. Unique to our project, we believe that this mechanism encourages new buyers to enter even when price is near 'All Time Highs'.

Just like real gambling, more purchases = more rewards to win. Our lottery pays out on every sell transaction to make it as fair as possible, and has awarded over 6,500 holders 100+ ETH total in its first 2 months. The development team has no control over this mechanism, and it operates autonomously and automatically, with all internal transactions fully visible. You do not need to make consecutive purchases to remain eligible for the lottery, but if you have transferred or sold your tokens you are no longer eligible, and must purchase again. The prize pots will continue to grow as volume and market cap increases. Not only are we fair, but we are also transparent. New winners are chosen on each run, ensuring that new buyers always have a chance to win.

## GSHIBA Ahead of the Game

Within a week of launch GSHIBA was listed on Coingecko and CoinMarketCap, and had accumulated over 1,000 holders and 120x of the listing price by week two, proving just how determined the founders are to succeed. Each Buy and Sell transaction is taxed 12%. 4% goes towards our Lottery, 4% to Marketing, and 4% to Development. The dashboard to view lottery winners is up and running for anyone to see current winners, along with the ability to check which Tier you are currently in. The development team is building out several gambling dApps and a betting platform to continue expanding on the internal utility of the token.

## Expanded Lottery Awards

GSHIBA believes in rewarding our investors not only through our original lottery system, but also through expanded promotional lotteries and giveaways. Our vision is to disrupt the awards concept within the crypto space and include additional massive rewards for purchasing GSHIBA. Our awards will continue to develop and evolve into multimillion dollar returns within the coming months.

In August 2021 GSHIBA launched its first 50 MC giveaway with a staggering 1st prize that has never been done before.

GSHIBA promised you all with Awards that will take the gambling & cryptocurrency world by storm, and this is just the beginning!! GSHIBA, the world's number one gambling cryptocurrency, is thrilled to announce a staggering 50M MC Giveaway like you have never seen before!!! 4th Place will Receive **\$10,000** of any stable coin of your choosing!

5th Place will Receive **\$5,000** of any stable coin of your choosing!

## Sponsored Lottery

GSHIBA is planning to launch its sponsored lottery service to market worldwide businesses through wining lotteries online with GSHIBA. This will open the door for businesses to gain exposure through our marketing teams and online portals. These sponsored lotteries will add value to the GSHIBA token's governance capacity as well as act as a catalyst to the expansion of the value of GSHIBA, the premiere gambling and lottery cryptocurrency of the world.

## GSHIBA Ecosystem and Development

GSHIBA is currently working on the development of its first online casino that exchanges GSHIBA tokens on its first online gambling exchange. But this is just the beginning... GSHIBACHIP, "a pure gambling chip", will be established within the GSHIBA ecosystem with a much higher supply. This token will directly target all online and physical casinos across the world, as well as their supporting entertainment and hospitality industry. This chip will become the flagship of GSHIBA and the official gambling Chip of the World. 30% of the GSHIBACHIP supply will go directly to wallets of our sponsors, promoters, business partners, casinos, and online gambling sites across the world. The purpose of this distribution is to encourage everyone to accept GSHIBACHIP and create liquidity pools with these wallets. The remaining 70% will be pooled for the community to exchange and gamble with.

We are so looking forward to accomplishing these goals with YOU, the best and most loyal community in the cryptocurrency gambling universe.

Stay tuned..
